

The latest Texas Instruments' products from Arrow Electronics North American Components

Innovation UPDATE

Leadership Services | Support | Products

Rev. 4/20/09

Device	Description	Webpage	Datasheet
More Hot New Products!			
Power Management:			
bq24072/3/4/5	Mini-USB Charger w/ Dynamic Power Management		
TPS65950	The Original OMAP™ Analog Companion		
bq77PL900	5 to 10 Li-Ion Cell Protector		
TPS780xx	Industry's lowest IQ LDO with integrated dynamic voltage scaling (DVS) for 4bit, 8bit & 16bit MCU market		
TPS62600	Industry's smallest 500-mA DC/DC solution		
TPS23753	PoE Powered Device (PD) with DC-DC Converter		
TPS51200	3A Source-Sink DDR Termination Regulator		
Signal Chain:			
OPA827	Industry's Lowest Noise JFET, Precision, Operational Amplifier		
VCA824	420MHz Variable Gain Amp w/ > 40dB Gain Linear in V/V Gain Adjust		
ADS5485	Fully Buffered 16-bit, 200 MSPS High Performance ADC w/DDR LVDS Outputs		
CC2590/CC2591	RF range extender for 2.4 GHz low-power RF-ICs		
CDCE72010	2:10 Ultra Low Jitter Clock Synchronizer		
ISO308x	Family of 4kV galvanic isolated 5V RS-485 transceivers		
TPD8S009	8-Channel ESD Protection for HDMI / DisplayPort		
TL16C752C	Dual UART with 64-Byte FIFO Directly Interfaces with 1.8V Processors		
TPA2016D2	First 1.4W Stereo Class-D Amp with AGC
