

Diodes Incorporated

MR16 Helical Display

This helical tree displays multiple LED MR16 retrofit solutions. The MR16 base houses highly efficient, low cost drive electronics centered around the ZXLD135x/6x driver family and can be configured to include PWM dimming and thermal feedback control. The ZXLD135x/6x devices from Diodes, Inc. are a proven solution for these applications and similar lamp assemblies. They are part of the expanding family of LED drive solutions designed specifically for ease of design and manufacture for the lighting industry.

Part Number: ZXLD135x/6x LED Driver IC Family >>

Features:

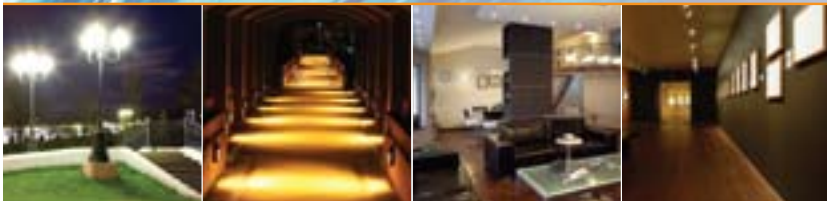

- High efficiency solution
- Low component count, small form factor
- Class 2 compliant
- Versatile and scalable
- Ease of manufacture
- Cost effective

Applications:

- MR16 retrofits
- Spot lighting
- Linear lighting
- Landscape/outdoor
- Accent lighting
- Class 2 compliant solutions
